

Table S1. Functional Enrichment Summary of Macrophage Subsets

Top pathways (BP/CC/MF/KEGG) with significance levels

Pathway (Ontology)	C0	C3	C2	C4	C1
protein folding (BP)	***	NS	NS	NS	NS
receptor-mediated endocytosis (BP)	***	NS	NS	NS	NS
response to heat (BP)	***	NS	NS	NS	NS
response to temperature stimulus (BP)	***	NS	NS	NS	NS
antigen processing and presentation of peptide antigen via MHC class II (BP)	***	NS	NS	NS	NS
vacuolar lumen (CC)	***	NS	NS	NS	NS
lysosomal lumen (CC)	***	NS	NS	NS	NS
primary lysosome (CC)	***	NS	NS	NS	NS
azurophil granule (CC)	***	NS	NS	NS	NS
secretory granule lumen (CC)	***	NS	NS	NS	NS
protein folding chaperone (MF)	***	NS	NS	NS	NS
IgG binding (MF)	***	NS	NS	NS	NS
unfolded protein binding (MF)	***	NS	NS	NS	NS
ATP-dependent protein folding chaperone (MF)	***	NS	NS	NS	NS
immunoglobulin binding (MF)	***	NS	NS	NS	NS
Lysosome biogenesis (KEGG)	***	NS	NS	NS	NS
Antigen processing and presentation (KEGG)	***	NS	NS	NS	NS
Phagosome (KEGG)	***	NS	NS	NS	***
Staphylococcus aureus infection (KEGG)	***	NS	NS	NS	NS
Lipid and atherosclerosis (KEGG)	***	NS	NS	NS	NS

Table S1. Functional Enrichment Summary of Macrophage Subsets

Top pathways (BP/CC/MF/KEGG) with significance levels

Pathway (Ontology)	C0	C3	C2	C4	C1
cytoplasmic translation (BP)	NS	***	***	NS	NS
ribosomal small subunit biogenesis (BP)	NS	***	NS	NS	NS
ribosome biogenesis (BP)	NS	***	NS	NS	NS
ribonucleoprotein complex biogenesis (BP)	NS	***	NS	NS	NS
antigen processing and presentation of exogenous antigen (BP)	NS	***	NS	NS	NS
cytosolic ribosome (CC)	NS	***	***	NS	NS
ribosomal subunit (CC)	NS	***	***	NS	NS
ribosome (CC)	NS	***	***	NS	NS
cytosolic large ribosomal subunit (CC)	NS	***	***	NS	NS
large ribosomal subunit (CC)	NS	***	NS	NS	NS
structural constituent of ribosome (MF)	NS	***	***	NS	NS
rRNA binding (MF)	NS	***	**	NS	NS
MHC class II receptor activity (MF)	NS	***	NS	NS	NS
ubiquitin ligase inhibitor activity (MF)	NS	***	NS	NS	NS
mRNA 5'-UTR binding (MF)	NS	***	NS	NS	NS
Ribosome (KEGG)	NS	***	***	NS	NS
Coronavirus disease - COVID-19 (KEGG)	NS	***	***	NS	NS
Hematopoietic cell lineage (KEGG)	NS	***	NS	NS	NS
Viral myocarditis (KEGG)	NS	***	NS	NS	NS
Asthma (KEGG)	NS	***	NS	NS	NS
T cell differentiation (BP)	NS	NS	***	NS	NS

Table S1. Functional Enrichment Summary of Macrophage Subsets

Top pathways (BP/CC/MF/KEGG) with significance levels

Pathway (Ontology)	C0	C3	C2	C4	C1
lymphocyte differentiation (BP)	NS	NS	***	NS	NS
T cell receptor signaling pathway (BP)	NS	NS	***	NS	NS
alpha-beta T cell activation (BP)	NS	NS	***	NS	NS
cytosolic small ribosomal subunit (CC)	NS	NS	***	NS	NS
cadherin binding (MF)	NS	NS	***	NS	NS
heat shock protein binding (MF)	NS	NS	***	NS	NS
protein-folding chaperone binding (MF)	NS	NS	**	NS	NS
Th17 cell differentiation (KEGG)	NS	NS	***	NS	NS
T cell receptor signaling pathway (KEGG)	NS	NS	***	NS	NS
Th1 and Th2 cell differentiation (KEGG)	NS	NS	***	NS	NS
chromosome segregation (BP)	NS	NS	NS	***	NS
DNA replication (BP)	NS	NS	NS	***	NS
nuclear division (BP)	NS	NS	NS	***	NS
mitotic sister chromatid segregation (BP)	NS	NS	NS	***	NS
mitotic nuclear division (BP)	NS	NS	NS	***	NS
chromosomal region (CC)	NS	NS	NS	***	NS
condensed chromosome (CC)	NS	NS	NS	***	NS
chromosome, centromeric region (CC)	NS	NS	NS	***	NS
nuclear chromosome (CC)	NS	NS	NS	***	NS
spindle (CC)	NS	NS	NS	***	NS
single-stranded DNA binding (MF)	NS	NS	NS	***	NS

Table S1. Functional Enrichment Summary of Macrophage Subsets

Top pathways (BP/CC/MF/KEGG) with significance levels

Pathway (Ontology)	C0	C3	C2	C4	C1
catalytic activity, acting on DNA (MF)	NS	NS	NS	***	NS
isomerase activity (MF)	NS	NS	NS	***	NS
macromolecular conformation isomerase activity (MF)	NS	NS	NS	***	NS
ATP-dependent activity, acting on DNA (MF)	NS	NS	NS	***	NS
Cell cycle (KEGG)	NS	NS	NS	***	NS
DNA replication (KEGG)	NS	NS	NS	***	NS
Mismatch repair (KEGG)	NS	NS	NS	***	NS
Base excision repair (KEGG)	NS	NS	NS	***	NS
Homologous recombination (KEGG)	NS	NS	NS	***	NS
positive regulation of cell activation (BP)	NS	NS	NS	NS	***
positive regulation of leukocyte activation (BP)	NS	NS	NS	NS	***
positive regulation of lymphocyte activation (BP)	NS	NS	NS	NS	***
leukocyte activation involved in immune response (BP)	NS	NS	NS	NS	***
cell activation involved in immune response (BP)	NS	NS	NS	NS	***
secretory granule membrane (CC)	NS	NS	NS	NS	***
tertiary granule (CC)	NS	NS	NS	NS	***
respiratory chain complex (CC)	NS	NS	NS	NS	***
lysosomal membrane (CC)	NS	NS	NS	NS	***
lytic vacuole membrane (CC)	NS	NS	NS	NS	***
oxidoreduction-driven active transmembrane transporter activity (MF)	NS	NS	NS	NS	***
immune receptor activity (MF)	NS	NS	NS	NS	***

Table S1. Functional Enrichment Summary of Macrophage Subsets

Top pathways (BP/CC/MF/KEGG) with significance levels

Pathway (Ontology)	C0	C3	C2	C4	C1
proton transmembrane transporter activity (MF)	NS	NS	NS	NS	***
NADH dehydrogenase (ubiquinone) activity (MF)	NS	NS	NS	NS	***
electron transfer activity (MF)	NS	NS	NS	NS	***
Leishmaniasis (KEGG)	NS	NS	NS	NS	***
Tuberculosis (KEGG)	NS	NS	NS	NS	***
Diabetic cardiomyopathy (KEGG)	NS	NS	NS	NS	***
Toll-like receptor signaling pathway (KEGG)	NS	NS	NS	NS	***
